Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 5 is rejected under 35 U.S.C. 102(e) as being anticipated by publication “One-IP:

Techniques for Hosting a Service on a Cluster of Machines” Computer Networks and ISDN

Systems, vol. 29, no. 8-1 3, (1997-09-01), Pages 1019-1027 by Damani, et al.

In Claim 5, Damani teaches about a Name and address server in a digital telecommunications network (Fig 2, DNS) having first (Fig 2, Stub A plus DNS) and second (Fig 2, Stub B, less DNS) addressing zones between which an interface caters for address translations, the said server being situated in the first addressing zone and comprising (Fig 2) (Page 18, lines 7-12):

a data storage module for storing associations between machine names “a1.nxb.com” and addresses of the first zone “42.81.13.22” (Page 17, lines 21-24); and (Mapping table requires storage).

a data processing module designed to respond to the receipt, originating from a first address of the first zone “42.33.96.5”, of a request for provision of an address in relation to the name of a destination machine “a1.nxb.com” belonging to the second addressing zone through the transmission to a second address “42.81.13.22” of the first zone of a first packet containing at least the said name of destination machine, and to send back to the said first address, after

Art Unit: 2144

receipt from the second zone of a second packet containing a third address "128.76.29.7" of the first zone associated in a dynamic manner with a second address of the second zone "128.76.28.4", a response providing the said third address of the first zone (Page 18, lines 1-12).

Allowable Subject Matter

3. Claims 1-4 are allowed. The following is an examiner's statement of reasons for allowance: Damani teaches about a technique for hosting a service on a cluster of machines using network address translator but fails to teach the method disclosed by applicant. In Applicant invention there are the additional level of addressing, which is introduced by the address interface and management unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,058,431 by Srisuresh, et al teaches about a system and method for network address translation as an external service in the access server of a service provider.

US 6,327,662 by Araujo teaches about a security system has client receiving Java applet downloaded from network access translator and transmitting data to server in response to authentication request.
